

Participate In Cerebral Palsy Research Today

Igniting Mobility in Adolescents & Young Adults with Cerebral Palsy

8 weeks of FREE physical therapy
and earn up to \$300!

YOU MAY BE ELIGIBLE IF YOU:

- » Are between the ages 11-45 years old
- » Have no diagnosis of dementia or Alzheimer's disease
- » Do not have any metal in your head or mouth (i.e., permanent retainer or braces); some dental work may be acceptable if it is not magnetic
- » Can walk for 1 minute with/without an assistive device

This study aims to determine the magnitude of the mobility improvements seen in individuals with cerebral palsy after undergoing a novel gait training approach.

Dynamic Imaging of Cerebral Palsy Gait

Earn up to \$200!

YOU MAY BE ELIGIBLE IF YOU:

- » Are between the ages 13-45 years old
- » Have no diagnosis of dementia or Alzheimer's disease
- » Do not have any metal in your head or mouth (i.e., permanent retainer or braces); some dental work may be acceptable if it is not magnetic
- » Can walk with/without an assistive device

This study aims to explore the neurophysiological differences experienced by participants with and without cerebral palsy during walking.

Transportation and accommodation reimbursement information will be provided for those who are not local.

We hope you or your family will consider participating in our studies to help improve the future knowledge and care of individuals with cerebral palsy.
